

# Management of Customer queues with waiting time

Innovative Queue management system dressing-rooms with Personal pagers for customers

- ✓ *Improve your privacy!*
- ✓ *Stop the in-store voice announcements to call Customers*
- ✓ *Avoid crowds in front of the dressing rooms*

Bi-directional Disk Pager:  
practical pagers to deliver to customers  
to call them individually with speed and  
discretion.  
Vibration, beep, intermittent leds

Touch screen  
Switchboard:  
the display shows the  
customers in the queue  
and the waiting time

| Pager Nr | Table Nr | Time  |
|----------|----------|-------|
| 11       |          | 02:45 |
| 8        |          | 03:01 |
| 13       |          | 03:22 |

*Ideal system to call customers waiting for the dressing room  
with ease and discretion.*

*Respect of arrival order, indication of waiting time*

**Customizable  
disk graphics**

## HOW TO USE:

1. The customer arrives at the fitting rooms for tests, the employee takes a disk and delivers it to the customer; from now on the switchboard display the number of the delivered disk pager and the timer appear.
2. The customer goes around the store to continue shopping.
3. A timer indicates the time elapsed since delivery disk to customers; the disks are displayed in order chronological.
4. The display shows three color codes in based on waiting time (green, yellow, orange).
5. When a dressing room is free, the clerk calls the first pager on the list in order to respect the order of arrival.
6. Data storage for management **STATISTICS:**  
nr. daily calls, average waiting time daily.

The system is completely modular and expandable. Important: the technical features of this system comply with the EN 300-220-3 standard for which it is NOT necessary to ask for any license or to pay any minimal fee.
