1. The "Integrated forklift driver Call" Linkman allows you to quickly call from the production line the forklift driver.
2. Possibility to customize the call with an alphanumeric message (eg machine name, production line abbreviation etc.).
3. The call of the wireless button activates the Monitor on board the forklift and at the same time also the pager with a beep and / or a vibration. The Monitor and the watch will indicate from which location the call arrives.
4. The forklift driver selection to monitor the activity (eg: I'm going to, stand by, work).
5. All activity is displayed and recorded on the manager's PC.
6. From the manager's PC it is possible to send messages in real time to the driver's monitor.
7. The head department call sends the signal to the pager in a beam of 100 mt (extendable with repeaters).
8. LPD system: requires no license or ministerial fees to be paid.
9. European Certification ECC / DEC Lpd (low power device) : requires no license or ministerial fees to be paid.
